ProBase™ Press Release

Waterproof, Tile Ready Shower Base

Noble Company has introduced ProBase, a waterproof, sloped shower base that is ready to be tiled. There is no need for a mortar bed over the base. ProBase is a composite made from high strength polypropylene honeycomb with a Noble Sheet Membrane laminated to the top. ProBase is packaged with everything needed to ensure a watertight installation. It can be used with standard clamping ring drains, and it allows for up to 2" of adjustment in drain position. ProBase is easy to install: just thin-set to the floor. Use ProBase and start saving today. For more information, visit www.noblecompany.com or call us at 800-878-5788.
