

## **FIREFIGHTER™ ELIMINATOR F AND C**

### **SYSTEM REQUIREMENTS AND LIMITATIONS**

All fire protection sprinkler systems that use FireFighter Eliminator F and C should conform to local, state and NFPA requirements. The use of antifreeze within these systems should also conform to NFPA requirements.

Use of antifreeze solutions should also be in conformance with any state or local health codes. Please contact your local health authorities if you have any questions concerning the codes in your area.
